Hopper, Full Stack Engineer
2024 - Present
Developing a luxury web travel portal for Capital One and creating APIs to book flights.

WePay Inc, Senior Software Engineer – Card Present Team
2018 – 2021 | Redwood City, CA
Developed and maintained features for a customer facing iOS SDK. The SDK enables seamless interaction with Verifone and Ingenico card readers. Maintained a sample integration app of the iOS SDK in Objective-C and Swift. Used SQL, Elasticsearch, and BigQuery to analyze and track payment data.

Supported the national launch of Chase's Point of Sales product, QuickAccept℠. Interfaced with customers to resolve integration issues. Interacted with third party software vendors to resolve various bugs.

Interviewed candidates for engineering positions. Mentored a junior engineer in a pilot apprentice program. Worked with product managers and engineering leads to prioritize tasks.

Software Engineer – API Team
Used Python, Java, and PHP to implemented customer facing RESTful APIs for payment reconciliation. Created NodeJS scripts to automatically generate internal and external documentation from OpenAPI schemas. Managed and improved a Python based app configuration microservice. Mentored an intern as they created a SDK generator.

Vimeo Inc, Engineering Intern – Creator Tools
Summer 2017 | New York, NY
Created a JavaScript SDK that enables users to embed videos on third party sites. Made a hack-a-thon tool that allows users to upload videos to Instagram from their Vimeo accounts.

Rice University, Teaching Assistant – Fundamentals of Parallel Programming
2017 – 2018 | Houston, TX

Rice University
2014 – 2018 | Houston TX
B.S. in Computer Science

Skills
Python
